

# The Benefits of a Multi-Company Accounting Solution

## Multi-Company Financial and Operational Reports

Automatically consolidate financial and operational reports for one vendor across multiple companies in a matter of minutes.

## Inter-Company Billing

Inter-company billing templates allow you to distribute one single invoice from the parent account across multiple subsidiaries, cutting down billing time.

## Inter-Company Transactions

Manage inter-company transactions with one voucher and distribute it to multiple companies, maintaining balance across all company accounts.

## Shared Master Files

Share vendor, contact and customer chart of accounts records with all appropriate companies and only maintain one master record for always up-to-date information.

## Multi-Company Cash Receipts

Manage money owed throughout your multiple companies in one transaction while retaining balance across all your accounts.

## Multi-Currency

Three tier currency model lets each company have their own home currency while all companies can be consolidated into a chosen reporting currency.

## Simplified Shared Expenses

Enter an expense once for any number of companies and automatically keep your 'due to' and 'due from' accounts in balance.

## Real-Time Reporting

Access and retrieve information when you need it, without delay, for concise analysis across all entities.

## Reduced Costs

Save money with a lower total cost of ownership by not spending extra money on redundant software licensing or time managing multiple databases.

## Increased Operational Efficiencies

Properly consolidated data eliminates extra time managing multiple databases creating greater efficiencies across your business.
