GRAVITY SOFTWARE

DIMENSIONAL REPORTING

EASILY TRACK EXPENSE CATEGORIZATIONS, PROJECTS, EVENTS OR REPAIRS

DOES YOUR SOLUTION TRACK THAT?

Few tasks are more frustrating than searching through databases to find a key piece of information you need to complete a project and coming up short every time.

That scenario is especially maddening when you know the data is in there somewhere, but you just can't come up with the magical combination of keywords that will bring it to the surface.

When it comes to accounting management, Gravity Software™ has all but eliminated that problem by adding an Advanced Multi-Dimensional Reporting Feature to its already multifaceted platform.

Ready to take the next steps?

Simplify your teams productivity and provide your business with the platform needed to grow. Contact us today to schedule a demo!

Features

- Create pre-establish codes based on specific accounting needs of the organization, its timelines, clients, departments or projects

- Have multiple dimensions for different purposes — one to track trade show revenue and expenses and another to track research and development costs

- Provide more structure by setting rules on how dimension codes are used

- Easily retrieve transactions without entering and re-entering different keywords

- Compile financial reports by dimension code

- Track costs by employee or manage charges for reimbursement purposes

- Turn dimensions on or off at any time
