JOB COSTING

MONITORING PROFIT MARGINS
IN THE CONSTRUCTION
INDUSTRY

ARE YOU MAKING ACCURATE COST PROJECTIONS?

When you're charged with monitoring profit margins in the construction industry, it's crucial to continually track costs on ongoing projects. It's all too easy to inadvertently leak profits when you're juggling multiple clients, jobs, materials, expenses, timelines and other elements of the trade.

CumulusApps has created a robust Job Cost solution powered by Gravity Software™. The solution is designed to assist contractors, subcontractors, and specialty contractors to help automate and streamline their accounting, job costing, billing, resource planning, document management and reporting needs.

Ready to take the next steps?

Simplify your teams productivity and provide your business with the platform needed to grow.

Features

- Instant, real-time reporting and metrics

- Options for user-created work categories and cost codes, allowing you to compile customized detailed reports

- Automate the process of generating G702 and G703 AIA documents, quickly producing the records needed for accurate billing

- Define retainer percentage by job, efficiently reporting on total scheduled values (sale amounts), amounts billed, amounts retained to date and amounts to finish

- Integrate information added to accounts payable vouchers, purchase orders and journal entries without need for duplicate data entry

- Offers Job Dashboards, Job Review Management, Vendor Compliance and Job Time Cards that can incorporate burden rates
